# Sooty Grunter

The sooty grunter is sooty-black. The fish lives in rivers.

The sooty grunter eats frogs.

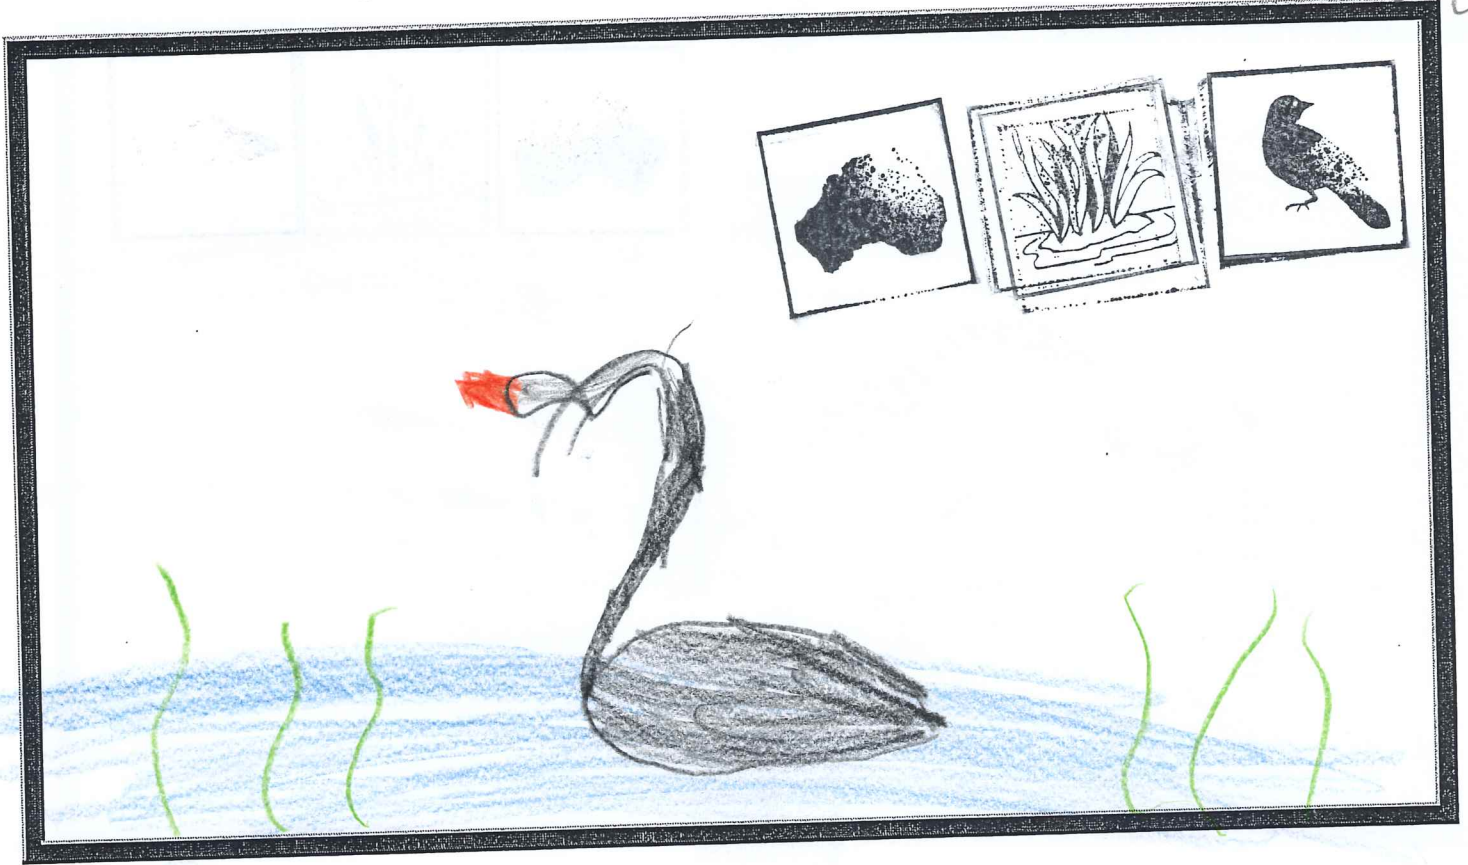

It also eats worms and

shrimp. They also eat palm berries.

black swan

Charlie

This swan is a very graceful swan. This swan eats seeds. It swims in rivers and lakes. They can reach 3 ft under the water. The male and female incubate its eggs.

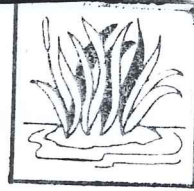

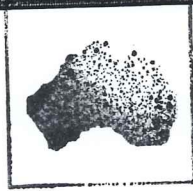

# Splendid dragonfly

The splendid dragonfly are mostly found flying over lily pads. The dragonfly likes to eat mosquitoes. The dragonfly can fly mostly any direction. The dragonfly picks it prey up with its legs. The splendid dragonfly can berth under water.

# Murray tortoise Charlie

The Murray tortoise hunts fish  
in a large river. The Murray  
tortoise lays its eggs in a hole  
by the river bank. The Murray  
tortoise's predator loves to eat the  
Murray tortoise's eggs. The Murray tortoise  
has a very dark green shell.

platypus

charlie

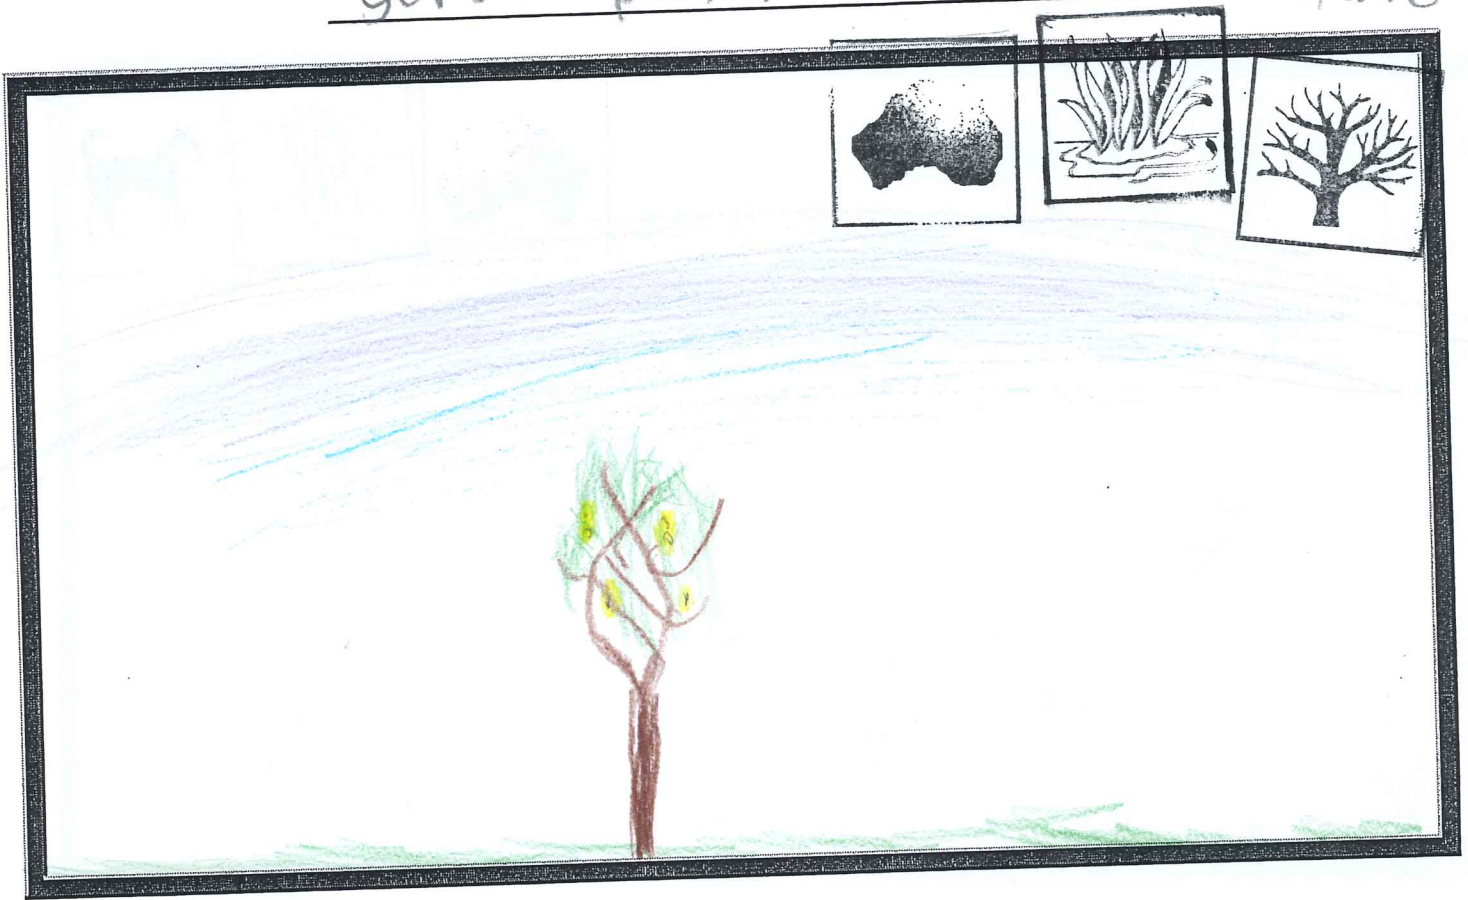

The platypus is like a beaver.  
This animal has a tail and a fur.  
It feeds milk to its babies.  
like a human. This animal lives  
in a creek. The platypus lays  
its egg like a snake.

screw palm

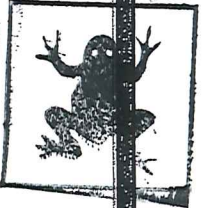

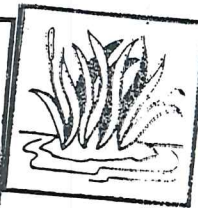

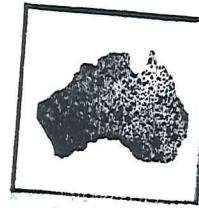

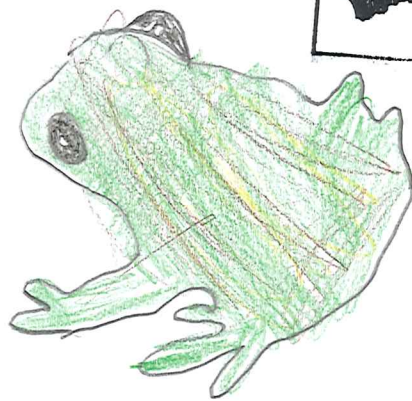

Charlie

This tree can be used to make  
rafts. The screw palm can be found  
in swamps or river banks. It has a  
twisted trunk. The screw palm roots  
prop roots. The screw palm grows  
nuts on its

bagyo frog

Charles

This amphibian could be called  
pobblebank because of the noise  
it makes. The female makes

foamy water. The female has special  
flaps on its fingers. It uses

special fingers to make  
bubbles to give the eggs oxygen.
