

Science Made Fun at Cedardale

Dear Grade 1 Families,

Division 11 and 12 will be participating in an exciting Science Made Fun in-class program on Monday, November 10th, 2025.

Science Made Fun BC programs provide hands-on activities that directly address scientific topics in our curriculum. We will be participating in the “Flash Bang” science workshop exploring the properties of light and sound: their sources, intensity, and interactions.

Program description: *What’s that noise, where is that light coming from? Learn about the properties of light and sound energy as we use our eyes and ears to help us understand where they start, and how they change and interact with the world around us.*

The cost of this hands-on learning experience is \$13.00 and is payable by School Cash Online.

We look forward to this fun and exciting learning opportunity!

Sincerely,

Mme Stephanie & Mme Sophia

I give _____ (student name) in Division ____ permission to participate in the Flash Bang Workshop at École Cedardale on Monday November 10, 2025.

I have paid \$13.00 via School Cash Online
