

**This example letter reflects a student with strong English skills and ambitious academic goals, such as graduating from the IB program and attending a top Canadian university. While it is still clear and well-organized, it uses a higher level of detail and language to reflect the student's competitive goals.**

Dear Admissions Committee,

My name is Jeniala. I am 15 years old, and I live in Hiriburua with my parents and my younger sister, Jakinduria. We also have a cat named Luna. I am excited to apply to West Vancouver Schools because I want to study in the International Baccalaureate (IB) program. My dream is to graduate from this program and attend the University of Toronto to study engineering.

I want to study in Canada because I know it has one of the best education systems in the world. It is a safe and welcoming country where I can meet students from different cultures. I chose West Vancouver Schools because of its excellent IB program, friendly community, and location near both the mountains and the ocean. I believe this school will challenge me academically, help me improve my English, and prepare me for university and future success. In my home country, I am currently in Grade 10. I have earned high grades, especially in mathematics, sciences, and English. I enjoy classes that challenge me to think critically and work with others to solve problems. My teachers often tell me that I am a hardworking and curious student who is not afraid to ask questions.

Outside of school, I try to live a balanced life. I am a member of my school's debate club, where I have learned how to research, organize my ideas, and speak confidently in public. I also enjoy swimming, which helps me stay healthy and focused. Music is another passion of mine, and I play the guitar for relaxation. In addition, I volunteer at a local community center, where I help younger students with their homework. I believe these experiences have helped me develop responsibility, patience, and leadership skills.

My future goal is to graduate from the IB program at West Vancouver Schools and attend the University of Toronto. I want to study engineering because I enjoy solving problems and hope to create new solutions that can help people. I know this path will be demanding, but I am ready to work hard, manage my time well, and learn everything I can. Thank you very much for reading my letter and considering my application. I hope I will have the chance to study at West Vancouver Schools, meet new friends, and grow as both a student and a person.

Sincerely,  
  
Jeniala
