Agenda for Dec PAC Meeting: Adopted by Dani Renouf and Roxana Pistol

### 1. Guest Speaker- Todd Lund, District SOGI (Sexual Orientation and Gender Identity) Lead

#### a. What is our common ground?

- i. Schools need to be safe, positive environments
- ii. Canada is comprised of diverse people, views, and being and all are celebrated
- iii. There is no room for discrimination in schools

#### b. What is SOGI?

- i. Sexual Orientation and Gender Identity
- ii. everyone has a sexual orientation, and everyone has a gender identity
- iii. it is not a curriculum or plan or agenda - it is a way of talking about a group of people, that includes everyone in the conversation
- iv. nice to think of it as a thread in the classroom and teachers can include in every day lessons and descriptions

#### c. What does SOGI look like in the classroom?

- i. family diversity, including same sex families, use the terms “gay” and “lesbian” openly
- ii. gender identity and stereotypes – the way it is expressed
  1. children assign pink and blue to gender identity - talking to kids about this at their age level
- iii. intermediate level - representation in LGB people in history and human rights
  1. using picture books or books to talk about human rights around the world
- iv. sexuality is both physical and emotional

- v. we need to recognize systemic discrimination
- vi. also recognize the unique contributions of queer people (artistic, political, history)
- vii. gender identity ties in with the history of trans people and global rights
- viii. but gender identity is separate from sexuality

#### **d. Final Thoughts**

- i. Adrienne Rich quote: “When those who have the power to name and to socially construct reality choose not to see you or hear you... when someone with the authority of a teacher, say, describes the world and you are not in it, there is a moment of psychic disequilibrium, as if you looked in the mirror and saw nothing”
  - 1. parallels between SOGI and systemic discrimination
- ii. So we want to present a mirror in the classroom where every child sees a reflection of themselves
- iii. statistically, the queer population at risk - 4 times the risk of suicide so we want to represent them in the world and have them reflected in the classroom
- iv. as parents and primary caregivers and educators, we are most able to help contribute
- v. in 2002, a court case to Supreme Court about books in the classroom - powerful thought - parental views however important cannot overrule the mirror and diversity that the school system is trying to impart - schools have an imperative to teach tolerance and diversity

Findings: school is the safest place for kids, and kids who are COVID positive, 80% traced back to parents (parent to child transmission); exposure contact is primary driver; community engagement is the second driver of transmission; lack of spread from child to child and child to adult (children are 9% of cases in VCH, despite being 17% of the population).
- m. COVID in children is mild, hospitalization is rare
- n. during short time school was closed, increased violence in household, and mental health - impact of school closure is greater than getting COVID - school is a determinant of health and imperative to health

## **Questions/Comments?**

1. Parent request to have VCH speak to parents so that there is an opportunity to dispel misinformation (ie. schools spread COVID, number crunching and misrepresentation of data, social media).
2. Comment that teaching online is more challenging than it seems for parents and staff and children/students.
3. Parents would like to know what contact tracing looks like. Language is confusion - self isolate vs self monitor - one to individuals may be different than the one to the whole school - VCH does not have a lag for contact tracing, parents are doing a good job of keeping kids at home and parents are diligent with this - testing takes a few days, and that the follow up from VCH is timely.

Parents, please do not organize play dates.
