

Administrative Procedure 370

STUDENT USE OF MOBILE DEVICES

Background

The District recognizes the capacity within particular new and future technologies, and their educated use, to create opportunities for many constructive and positive applications that can aid the instructional process. Students can use these technologies to create digital content, to communicate, to collaborate and share, and to access apps and tools that may enrich their learning. Further, some regulated use of mobile devices in the school and community may contribute to the safety and security of students and staff. The District also recognizes that unregulated use of such devices may pose a risk to personal safety; may disrupt instruction; may invade personal privacy, and may compromise academic integrity.
